| Dust suction |
| Mains operation |

### Integrated vacuuming system

- The guard ensures that polishing dust stays under the machine. The dust is collected in the dust container by passive vacuuming to reduce dust impact while polishing.
- Any dust collected is easy to empty –The filter bag is designed for multiple uses.

### Automatic contact pressure

- The pad drive board is spring-mounted. The contact pressure is automatically regulated for consistent polishing results.
- The pad maintains optimal surface contact and follows any floor unevenness.

### High polishing speed

- 1,500 rpm for perfect polishing results.
