

i-suit Pro

Compact ergonomic window washing support system

Clean windows with precision and control

The i-suit Pro is an ergonomic support system for professional window cleaners who work with water fed telescopic poles. It follows natural cleaning motions so small range movements in tight spaces stay efficient, helping teams keep pace with less effort and achieve faster results.

Product application

Lower windows, **short strokes**

Sites with 2-3 m of **clear walking space**

Tight sites with **obstacles**

Product specifications

45 x 42 x 63 cm

2.3 kg

3-12 m

Faster

Keep pace with less effort in tight spaces and get faster results.

Cleaner

Centered load and guided motion improve control, keeping the brush in contact for consistent results.

Greener

Made with durable materials that have a long lifespan. Parts are easy to replace and recycle.

Safer

The ergonomic harness centers the load, reducing strain on the neck, shoulders, and back.

Better for everyone

Use the i suit Pro at sites with obstacles where short, controlled movements are needed. This helps keep quality consistent and reduces strain-related interruptions.

Why the i-suit Pro is your choice:

1. Support bend tube

Positioned near the chest to follow the natural cleaning movements.

2. Ergonomic harness

Shifting the load to the body's center, reducing strain on neck, shoulders, and back.

3. Color markers for quick switching

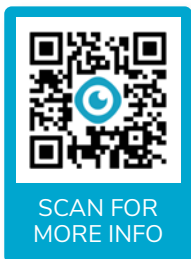

Slide the side-switch strap to the blue (left) or grey (right) markers to center the load, maintain balance and reduce strain.

4. Durable materials

For a longer lifespan.

5. i-glasses

Help you keep sight of the brush while reducing neck and back load.
